

Tip #20

Creating a successful business group

The idea is to have a conversation so you can clearly understand what each member's vision and needs are. Use for Coach Tip.

1. Who feels they can get more out of their group?
2. What is your vision for a properly functioning group?
3. What do you need to be an effective member of the group?
4. What does a successful group look like?

Thing to consider:

- # of members
- Growth of group
- Referrals
- Goals
- Working together
- Collaborating
- Who do you want to do business with
- Accountability
- Who can help you
- What do you need

Have the conversation so you can have a clear vision of what your group sees as successful this will then give you the foundation to create a plan of action on what it takes and brings clarity to what your group would like to achieve.
